Summary

Seasoned Android Developer with over seven years of experience. Proficient in Kotlin and Java, with additional familiarity in Swift and JavaScript. Versatile professional with experience in on-site, remote, and hybrid work environments. Relocated to Germany in early 2023. Fluent in English and have an intermediate level of proficiency in German. Open to remote or hybrid positions within a two-hour radius of Leipzig (e.g. Dresden, Berlin, Magdeburg), as well as on-site roles in Hamburg or Munich, or fully remote opportunities across Germany.

Experience

Mobile Application Developer - *flaTeXDEGIRO SE*

Full Time | *Zwickau, Germany (Hybrid)* | *2026-01 to now*

Tech Stack: Kotlin, Java, Swift, iOS

- Focused on Android development.
- Responsible for iOS code review and quality assurance.

Android Developer - *AQMS GmbH*

Full Time | *Radebeul, Germany (Hybrid)* | *2025-05 to 2025-09*

Tech Stack: Kotlin, Java, Jetpack Compose, Figma, Material 3, Exoplayer

- Led a complete UI overhaul of the Android app, including a major redesign of video player controls and content navigation, resulting in a more intuitive and engaging viewing experience.
- Migrated legacy XML-based layouts to Jetpack Compose, modernizing the codebase, reducing UI complexity, and improving maintainability and development speed.

Android Developer - *BestNET*

Consultant | *Remote* | *2024-09 to 2025-03*

Tech Stack: Kotlin, Play Store, ViewBinding, Architecture, Performance

- Refactored the app's architecture, introducing modular design, dependency injection, and clean separation of concerns to increase maintainability, testability, and developer onboarding speed.
- Managed the complete Google Play release process: prepared release builds, configured Play Console assets, managed release tracks, and coordinated production and staged rollouts, ensuring compliance with Play Store policies and a smooth user update experience.

Android Developer - *Appsfactory GmbH*

Full Time | *Leipzig, Germany (On-Site)* | *2023-01 to 2024-08*

Tech Stack: Kotlin, Java, Azure, Figma, Room, Android Automotive, Appcenter, Jetpack Compose

- Maintained and extended a flagship news application, delivering new features and UI improvements while ensuring high stability under heavy daily traffic.
- Owned the Android codebase, managing releases, bug fixes, and performance tuning in close collaboration with backend and QA teams.
- Contributed to several high-visibility apps and multiple parallel projects in the Media Unit and Health Unit, adapting app architectures to diverse client requirements.

Android Developer - *PATH - Product and Software House*

Full Time | *Remote* | 2021-03 to 2022-10

Tech Stack: Kotlin, Java, Retrofit, Firebase, DataBinding, ViewBinding, Fastlane

- Owned the full development lifecycle for the tuttur.com Android app, leading planning, implementation, and release activities independently in a remote workflow.
- Modernized and refactored the legacy codebase, migrating outdated components to contemporary Android standards and increasing code maintainability, performance, and security.

Mobile Application Developer - *BestNET*

Full Time | *Antalya, Türkiye (On-Site)* | 2020-02 to 2021-03

Tech Stack: Kotlin, AndroidX, Retrofit, Spring Boot, Firebase

- Led Android development as the sole developer, taking full ownership of feature delivery, code quality, and all release cycles.
- Architected and integrated comprehensive Firebase services, including Realtime Database, Crashlytics, Analytics, and Push Notifications to enhance app reliability and engagement.
- Implemented Bluetooth printer support, empowering users to print receipts and reports directly from the mobile app.
- Implemented barcode scanning capabilities using the device camera for fast product lookup and inventory operations, streamlining in-app workflows.

Mobile Application Developer - *Self-Employed*

Freelance | *Remote* | 2017-02 to 2019-12

Tech Stack: Kotlin, Swift, Java

- Built and shipped Android and iOS apps
- Delivered projects E2E under tight deadlines
- Provided backend dev support when needed

Tech Stack

Android: Jetpack Compose, CameraX, Android Automotive, Wear OS, Dagger, Hilt, Koin, Coroutines, Flows, Gradle, MVVM, MVP, Retrofit, ViewBinding, DataBinding, Material 3, ExoPlayer, Clean Architecture, Jetpack Navigation, Custom Views, Room

Backend: Node.js, Spring Boot, REST APIs

DevOps: Github Actions, Azure, Appcenter, Fastlane

Tools: Git, GitHub, GitLab, Bitbucket, JIRA

Ai: GitHub Copilot, Codex CLI, Gemini CLI, Windsurf, Antigravity, Prompt engineering, AI-assisted code review, AI-assisted refactoring

Design: Figma, Zeplin

Firebase: Analytics, Crashlytics, Hosting, Push Notifications, App Distribution, Cloud Functions, Realtime DB, Firestore, Authentication, Remote Config
